## EDITORIAL TEAM

### **EDITOR IN CHIEF**

Sri Padma Sari, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia

### **ASSOCIATE EDITORS**

- Suhartini Suhartini, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia
- Nana Rochana, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia
- Fatikhu Yatuni Asmara, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia
- Megah Andriany, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia
- Asih Nurakhir, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia

### **EDITORIAL BOARD**

- Mardiyono Mardiyono, Department of Nursing, Health Polytechnic of Semarang, Indonesia
- Faustino Jerome G. Babate, Beta Nu Delta Nursing Society, Philippines
- Sri Warsini, School of Nursing, Universitas Gadjah Mada, Indonesia
- Meira Erawati, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia
- Meidiana Dwidiyanti, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia
- Untung Sujianto, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia
- Luky Dwiantoro, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia

### **ASSISTANT EDITOR**

Pradipta Ary Pamungkas, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia

### **ADMINISTRATION**

Septi Harni Wahyuningtyas, Department of Nursing, Faculty of Medicine, Diponegoro University, Indonesia

## AIMS AND SCOPE

The **Nurse Media Journal of Nursing (NMJN)** is an international nursing journal which publishes scientific works for nurses, academic people and practitioners. NMJN welcomes and invites original and relevant research articles in nursing as well as literature study and case report particularly in nursing.

This journal encompasses original research articles, review articles, and case studies, including:

- Adult nursing
- Emergency nursing
- Gerontological nursing
- Community nursing
- Mental health nursing
- Pediatric nursing
- Maternity nursing
- Nursing leadership and management
- Complementary and Alternative Medicine (CAM) in nursing
- Education in nursing

## PUBLICATION INFORMATION

The **Nurse Media Journal of Nursing (NMJN)** is published twice a year every June and December.

For year 2018, 2 issues (Volume 8, Number 1 (June) and Number 2 (December) are scheduled for publication.

The NMJN is published by the Department of Nursing, Faculty of Medicine, Diponegoro University and available at <http://ejournal.undip.ac.id/index.php/medianers>. It has been indexed and abstracted in Google Scholar, Directory of Open Access Journal (DOAJ), Indonesian Publication Index (IPI) and Science and Technology Index (SINTA 2).

## JOURNAL CITATION

Articles of the Nurse Media Journal of Nursing has so far been cited in:

Google Scholar h-index / i10-index	: 11/13
Total articles published in Google Scholar	: 77 (since 2012)
Total citations in Google Scholar	: 309 (since 2012)
Total articles indexed in IPI	: 99 (since 2014)
Total articles indexed in DOAJ	: 77 (since 2015)
SINTA h-index / i10-index	: 11/10 (since 2017)
Total Citations in SINTA	: 295 (since 2017)

## INDEXING AND ABSTRACTING

The Nurse Media Journal of Nursing has been covered (indexed and abstracted) by the following indexing services:

- Google Scholar;  
(<https://scholar.google.co.id/citations?user=Gz6nEgkAAAAJ&hl=en>)
- Portal Garuda/Indonesian Publication Index (IPI);  
(<http://id.portalgaruda.org/?ref=browse&mod=viewjournal&journal=1284>)
- Indonesian Scientific Journal Database (ISJD)  
(<http://isjd.pdii.lipi.go.id/index.php/Direktori-Jurnal.html>)
- Directory of Open Access Journal (DOAJ).  
(<https://doaj.org/toc/2406-8799>)
- Science and Technology Index (SINTA Score=S2)

## PREFACE

The Nurse Media Journal of Nursing (E-ISSN: 2406-8799, P-ISSN: 2087-7811) is an open access international journal which publishes the scientific works for nurse practitioners and researchers. The journal is published by the Department of Nursing, Faculty of Medicine, Diponegoro University and strives to provide the most current and best research in the field of nursing. The journal has been indexed in the Google Scholar, Portal Garuda/Indonesian Publication Index (IPI), Indonesian Scientific Journal Database (ISJD), Directory of Open Access Journal (DOAJ), Science and Technology Index (Sinta), and EBSCO. Currently, NMJN is also in the process of indexation in the ASEAN Citation Index (ACI) and Scopus.

It is also with pleasure to inform you that the Nurse Media Journal of Nursing (NMJN), has received accreditation from the Directorate General of Research Strengthening and Development, the Indonesian Ministry of Research, Technology and Higher Education in November 2016. Based on the Science and Technology Index (Sinta), NMJN is in the second rank (Sinta 2). Upon this achievement, the NMJN would like to thank all people (editorial team, reviewers, and authors) who have given their support and contribution in achieving this position.

This issue (Volume 8 Number 1, June 2018) has published five articles, consisting of three correlational studies, one descriptive study, and one interventional study. This issue was authored and co-authored by the researchers and professionals from diverse countries, including Indonesia, Philippines, and Saudi Arabia. All papers have been doubled-blindly reviewed by the editors and reviewers of this journal.

The first article was a descriptive study conducted by Abe and Tuppal (2018). This study evaluated the National Patient Safety Goals (PSG) level of attainment in selected three tertiary hospitals in Metro Manila, Philippines. Two hundred and fourteen nurses were recruited. The study showed that the PSGs level of attainment obtained high extent. The results indicated that the selected hospitals have a high level of attainment for patient safety goals and remain at the core of health service delivery in each organization.

The second article was a correlational study which aimed to investigate the quality of life (QOL) in patients with diabetic foot ulcer in each domain and investigate the factors associated with this condition (Sari, Purnawan, Sumeru & Taufik, 2018). The result of this study revealed that the QOL in the domains of emotions, positive compliance, family life, and friend were high, while the QOL in the domains of daily activities, physical health, leisure, finances, positive attitude, and treatment ranged from low to average.

The next article was authored by A'la, Setioputro, and Kurniawan (2018). This study explored 192 nursing students' attitude and its relationship with the students' demographic profile in caring for the dying patients in Indonesia. The study used the Frommelt Attitudes towards the Care of the Dying Care Form B Indonesian version (FATCOD-BI) as the instrument. The results showed that student nurses' attitude in caring for dying patients was in the low category and there was no significant relationship between gender and training experience and students' attitudes towards caring for the dying patients. In contrast, experiences in caring for dying patients and academic level were associated with students' attitudes.

The next article was an interventional study examining the effects of self-management counseling on physical health status in 60 patients with pulmonary TB (Jauhar, Nursasi, & Wiarsih, 2018). The counseling was given for four sessions in two weeks for about 60-90 minutes each session in the intervention group. The result showed that the physical health status in the intervention group increased, but there was no influence of self-management counseling on the improvement of physical health status. These findings need more rigorous studies to investigate the effect of self-management counseling delivered at early treatment on the improvement of physical health status.

The last article was conducted by Kusuma, Ropyanto, Widyaningsih and Sujianto (2018). This study was a correlational study aiming to analyze the relating factors of insomnia in hemodialysis patients. The study involved 102 patients in two dialysis units in Semarang, Indonesia. The result revealed that insomnia occurred in 63 respondents (61.8%). Further analysis indicated that insomnia was related to anxiety and age, whereas other factors such as gender, education level, occupation status, marital status, hemoglobin level, smoking and coffee consumption habit, and dialysis factor (period of dialysis) were not correlated. This study recommends that anxiety screening should be performed on hemodialysis patients.

Finally, the NJMN would like to thank the authors, reviewers, and editors for their contribution and collaboration in publishing this current issue. Also, the editors would like to appreciate and call for academic papers from the nurse-practitioners, academicians, professionals, graduates and undergraduate students, fellows, and associates pursuing research throughout the world to contribute to this international journal.

Semarang, June 2018

Sri Padma Sari

Editor-in-Chief  
The Nurse Media Journal of Nursing
